

Field Service Technician – South West England

Vacancy 1: Field Service Technician

Vacancy 2: Field Service Team Leader

Almost everyone wants their career to be meaningful and fulfilling, working in the water industry sector can be just that. Helping water companies throughout the world to manage their complex wastewater sewer networks, prevent flooding, reduce pollution and improve rivers and bathing water. Detectronic Ltd specialise in the design, manufacture and installation of wastewater flow, level and water quality monitoring equipment for smart network monitoring of sewerage, wastewater and trade effluent.

Being a market leader requires a great team with first class skills, and enthusiasm. If you would like to become part of the growing Detectronic family and take your career to a new level you should get in touch.

What the job entails:

As part of the field services team, you will carry out installation, calibration and maintenance of Detectronic's Smart Flow and Level monitors in the wastewater network, predominantly in the South West of England. There may also be a requirement to travel to other interesting and picturesque parts of the UK too.

What you offer us:

- Ability to work safely and effectively as part of a two or three man crew installing and maintaining equipment onsite, diagnosing problems and taking appropriate action with minimal supervision. Don't worry, you'll be given comprehensive training when you start, as well as ongoing support.
- You'll be resourceful, practical, physically fit and hands-on.
- A full clean UK driving licence that allows you to drive 3.5 tonne vehicles, held for at least 2 years. There may be long distances to drive between sites and you'll see some fabulous places.
- You won't be fazed by working outside in all weathers or in confined spaces like manholes.
- You may need to access manholes at people's homes or at business sites, so we'll need you to always be polite and respectful.

Our training programme includes but is not limited to: IOSH (SHE), CSCS, Confined Space (medium risk), NRSWA (Unit 2: Signing, Lighting and Guarding) and First Aid. Please tell us if you already have any of these or other certificates.

What we offer you:

- Full training package, pension, company bonuses (business performance dependant), 20 days holiday + bank holidays plus an extra day for each year of service capping at 5 extra days.
- Salary £20k-£24k dependent on experience.
- No two days the same, which means you'll always be learning and finding new challenges to get stuck into.
- On occasion, the schedule may lead you to stay away from home, in which case we offer a generous nightly working away allowance.

All employees are subject to driving licence, DBS and reference checks.

To apply, please **download the application form** from the website, complete in Microsoft Word and **send together with a copy of your most recent CV** to careers@detectronic.org quoting the position title as the subject header.
