

TRADE EFFLUENT MONITORING

GOLD SCHEME

Remove the headache from monitoring your trade effluent discharges with our complete monitoring solution.

7 days a week, a team of dedicated data analysts will remotely monitor the sites trade effluent discharge point, and inform the client of any issues that may be occurring. Should any trade effluent monitor or auto sampler fail, a field service response team is available to ensure all equipment is back up and running within 48 hours. For regulatory compliance, monthly data reports

are issued to the client detailing trade effluent discharge compliance, and for added confidence bi-annual calibrations visits are made to ensure all data reports are reliable.

OUR SERVICES

We are driven by delivering results that keep you compliant and leaving you time to you run your business.

Regardless of whether your site is large or small, has single or multiple monitoring points, we will develop a service solution to meet your requirements. Our Gold Scheme package offers great value and reliable service at every level.
